

Established in 1968, Blum-Novotest GmbH is one of the globally leading manufacturers of high-quality measuring and testing technology. With more than 550 staff and subsidiaries in Europe, North/South America, India and Asia, we are working for customized and future-oriented solutions in the field of measuring technology for machine tools, automotive and aircraft industries, consumer electronics, etc.

We are currently looking for an experienced candidate for the position:

CNC Service engineer/technician, Mechatronic, Electronic or Engineering for Russia (m/f)

Your job responsibilities:

- On-site maintenance, installation and commissioning of BLUM measuring components
- Technical and technical sales support
- On-site assistance and training
- Developing, planning, carrying out, evaluation of projects and test series
- Presentation at customers' sites
- Hotline and preparation of internal manuals
- Interface to the headquarter

Your profile:

- Engineering background, with job experience in CNC machine tooling (Fanuc controls, Siemens, Heidenhain)
- Experience in CNC macro and PLC programming
- Experience in installation of electrical components on CNC machines
- Previous employment in the field of mechanical engineering/electrical engineering, ideally from the machine tool industry
- Excellent communication skills and outstanding service-, customers- and sales orientation
- Soft skills such as independency, loyalty, stress resistance, and openness to new projects.
- Travel within Russia
- Fluent technical English mandatory

If you are interested and meet the above mentioned requirements, please send your application documents to info.russia@blum-novotest.com
